# MP3 Splitter and Joiner:

MP3 Splitter & Joiner is a very useful MP3 audio editor. It builds MP3 Splitter(MP3 Cutter and MP3 Joiner in one, you can split, cut, trim a large MP3 file into multiple smaller pieces or join, merge multiple MP3 files to a larger one. Split and merge MP3 files directly without MP3 re-encoding, it is fast and keeps exactly the same sound quality of original MP3 files. This application is practical, simple, easy-to-use and very user-friendly.

# Objectives:

- To easily edit audio MP3 files.
- To split, cut, trim large MP3 file into multiple smaller pieces.
- To merge multiple MP3 files to a single file.
- Splitter and Merger included in the same application.

# OUTLOOK OF MY PROJECT:

## 1.Splitter Panel:

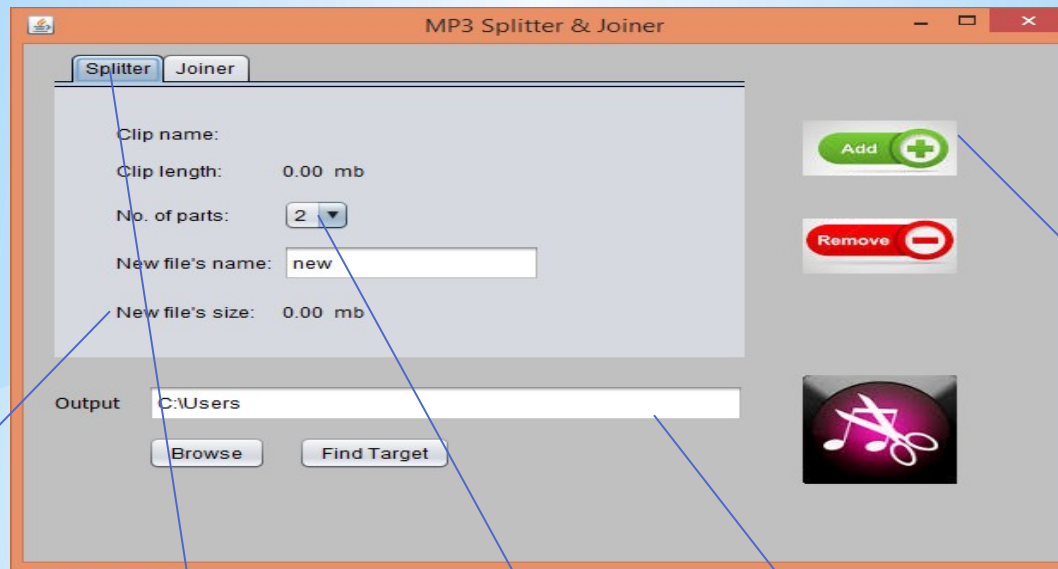

Here user will be required to add source file, specify the number of parts to split the file into and provide new file name and destination. Further a file can split into a maximum of 5 parts and by default it is 2.

## 2.Joiner Panel:

Here the user will be required to add more than one file to be merged and provide new file name and destination. Further not more than 5 files can be merged so an alert box shows the respective error. Also any of the selected file can be removed.
